The vessel's name is not known but it is thought to be the Danish schooner *Harmonie* which vessel left Takao on 4th Aug., bound to Shanghai. NEW MEDICINE!

THE GREATEST SUCCESS OF THE AGE!!!

NO MORE COD-LIVER OIL, SYRUP OF IODIZED HORSE-RADISH of GRIMAULT and Co., Apothecaries and Chemists, 7, Rue de la Feuillade, Paris, According to the certificates of the physicians of the Paris Hospitals, detailed in the prospectus, and with the approbation of several Academies, this Syrup is employed with the greatest success in place of *Cod-liver Oil*, which it is really superior. It cures diseases of the chest, scrofula, lymphatic disorders, green sickness, muscular atony, and loss of appetite, *it regenerates* the constitution by purifying the Blood, and is, in a word the most powerful depurative known. It never fatigues the stomach and bowels like the iodide of potassium and the iodide of iron, and is administered with the greatest efficacy to young children subject to humours, or obstruction of the glands. Dr. CAZENAVE, of Saint Louis hospital, Paris, recommends it particularly in cutaneous diseases conjointly with the pills which bear his name.

PHOSPHATE OF IRON, Du LEBLAS, apothecary, doctor of science, 7, Rue de la Feuillade, Paris.—This new ferruginous medicine contains the elements of the bones and blood, and iron in a liquid state. From observations made in the Paris hospitals and detailed in the prospectus, it is superior to *ferruginous pills, lactate of iron, iron reduced by hydrogen, pills and syrup of the iodide of iron*, and cures rapidly, *stomach complaints, painful digestion, poverty of the blood, want of strength and apoetite, and the diseases incident to females*. It is the best adjunct to Cod-Liver Oil, and the best preserver health in tropical climates.

ELIXIR OF PEPSINE prepared by GRIMAULT and Co., chemists, 7, Rue de la Feuillade, Paris, according to the formula of Dr. CORVISART, knight of the Legion of Honour, physician to H.M. the Emperor of the French. PEPSINE is the gastric juice itself, or rather the digestive principle purified, which digests food in the stomach. When from various causes the supply of the digestive fluid is too small, the inevitable consequences are, bad digestion, *gastritis, gastralgia*, inflammation of the mucous coats of the stomach and bowels, heartburn, anæmia, loss of strength, and in females, general derangement. *The elixir of Pepsine*, which is sanctioned by the approbation of the Paris Academy of Medicine, speedily cures all such diseases, and prevents vomiting during pregnancy.

INTERNAL OR LOCAL NEW CURATIVE AGENT.

MATICO.
GRIMAULT & Co., PARIS.

THIS new remedy is prepared from the leaves of a Peruvian pepper shrub, called *Matico*, and CURES PROMPTLY and INFALLIBLY without any fear of inflammatory results. The great majority of Physicians in Paris, Prussia, Germany, and New York, now use no other remedy. Full Directions accompany each Bottle and Packet, or an explanatory treatise will be sent post-free for 9d.

THE COMMERCIAL BANK OF INDIA.

THIS Company has been formed for the purpose of purchasing a site in the Colony of Hongkong for Docks and constructing Docks and erecting suitable Premises thereon for carrying on the Business of Building or Docking and Repairing Steamers and Sailing Vessels, and for the purchase of the Docks now owned and carried on at Whampoa by Messrs. T. HUNT & Co. with the Appurtenances Plant and Good-will of the Docking Business of that Firm.

It is proposed to register, the Company as one of Limited Liability either under the Imperial Act or under any Ordinance which the local Legislature may pass enabling local Companies to do so, the property of the Company in the meantime being vested in the Trustees, and the Deed of Settlement of the Company, now in course of preparation, is being framed in accordance with this intention.

The very considerable increase in the number of Vessels employed in what may be termed local trade, or in voyages that either originate or terminate, at Hongkong, in addition to the great quantity of tonnage visiting the Port from all quarters of the World, afford ample scope for the remunerative operations of Dock Companies, in addition to those which are already in existence.

Application has been made to Her Majesty's Government with reference to obtaining a site for the proposed Docks in the Colony, and the project has been favourably entertained, steps being in progress to facilitate this object, the necessary preliminary investigations as to the suitable character of the proposed site having been conducted and satisfactorily reported upon, by Mr. B. D. HAWLINS.

Liberal support has been promised to the undertaking which it is contemplated must necessarily prove a very remunerative one.

Further applications for Shares can till further notice be addressed to the Undersigned from whom forms of application and all particulars can be obtained.

E. H. POLLARD, Esq.

The Scheme of a Local Bank for this Colony with Branches at the most important places in China, has been in contemplation for a very long period.

The local and foreign trade in Hongkong and at the open ports in China and Japan has increased so rapidly within the last few years that additional Banking facilities are felt to be required.

The Banks now in China being only branches of Corporations whose head quarters are in England or India, and which were formed chiefly with the view of carrying on exchange operations between those countries and China, are scarcely in a position to deal satisfactorily with the local trade which has become so much more extensive and varied than in former years.

This deficiency the Hongkong and Shanghai Banking Company will supply, and will in fact assume the same position with relation to this Colony as the Presidency Banks in India, or the Banks of Australia in their respective localities.

The Establishment of a Mint in Hongkong, providing an adequate supply of proper currency, will render a local Banking medium essential to carry out its operations; and the almost certain disappearance of the existing Compradore system (so far as money is concerned) will also ensure Banks becoming in course of time the exclusive medium for the transaction of the monetary operations connected with trade.

For the anticipated success of this enterprise there are therefore ample grounds; and the great prosperity which has attended the working of other local associations in China clearly shows that the largest profits are obtained by those Public Companies which possess an interested local body of Proprietors or Shareholders whose support naturally forms a chief element of remunerative success.

The Bank will commence operations simultaneously in Hongkong and Shanghai as the importance of its business at the latter place must be very great, it is intended to establish a local Board of Directors there for more effectually meeting the work. As circumstances render it advisable the Bank will establish Branches at other places.

In the distribution of Shares Hongkong and Shanghai will equally participate. Shares will also be reserved for the other ports in China and Japan and for persons residing elsewhere, who are directly interested in the China Trade.

Applications for Shares must be addressed until further notice, to the Provisional Committee, care of

SELECTION,	Nabucodonozor,	*Verdi*

VALSE,	"Violante,"	*D'Albert*

On the 29th Ultimo, the steamer *Hankow* took to Canton about 360 cannon for the Chinese government, which made her so deep that she did not reach her anchorage until half past ten P.M. The delay in the discharge caused her departure from Canton to be postponed until four the next afternoon.

There surely must be some important movement on the *tapis* or otherwise the Mandarins would not go to such an expense in purchasing so large an amount of Ordnance. We hope that the Imperial government, seeing that they have the power to tread one rebellion, will not relax their efforts until they shall have succeeded in extirpating it.

It certainly appears to us that we have not yet seen anything like an approachable statement published of the result of the conflict between the *Alabama* and the *Kearsarge*.

First, regarding the vessels themselves,—we cannot bring ourselves to the belief that they were anything near the same size. The *Alabama's* extreme beam was only thirty two feet,—her pivot guns were made of wrought iron, and her six broadside guns were only medium 32s. It is clear that her battery was especially selected for lightness, and hence her small beam.

The *Kearsarge's* pivots were 11 inch Dahlgreens, and four long 32s, which armament must have been at least double the weight of the *Alabama's*. What the *Kearsarge's* beam must be to stand such a battery, we can only conjecture; but judging by other United States ships of war, we should say forty feet at least. This circumstance alone conclusively proves to our mind that there was a vast difference in the size of the two ships.

Next, as to their respective armaments, we think we can show that there was a corresponding discrepancy. The Federal accounts all say that the pivot guns of the *Alabama* consisted of two rifled pieces, one a 100 pr, the other a 68, and that the *Kearsarge's* consisted of two 11 inch Dahlgreens. Now the reader must remember that the shot of rifled cannon is not round but oblong, and denotes the strength of the piece, rather than its calibre. The bores of the *Alabama's* pivot guns could not have been half the size of those of the *Kearsarge*, and although rifled cannon are well adapted for long ranges, still they must necessarily be ineffective at close quarters for shell practice, firstly because as shells they carry a small charge of powder, and secondly, because their velocity being great they are liable to go through both sides if a vessel without exploding.

The fight between the *Kearsarge* and the *Alabama* was at about a quarter of a mile distant—consequently the rifled cannon of the latter lost all their advantage, whilst the distance precisely suited the *Kearsarge's* pivot guns, which are of the most effective description ever invented for naval warfare under such circumstances. It was the 11 inch Dahlgreen gun that drove the French and the English to construct armor plated vessels. In fact it was this very gun that reduced the "wooden walls of Old England" to slaughter houses.

The Americans went on large shot and slow velocity—The English on smaller shot and quick velocity. The Americans used about half the charge of powder that the English did, and consequently devoted the strength of their cannon to throwing heavy projectiles rather than to resisting the explosive effects of the charge. The 11 inch Dahlgreen is a two-monthons gun, throwing a shell of sufficient *weight* to penetrate the side of any wooden ship that can be brought within short range, but not through both sides—so that the explosion must take place on board. The shells of the *Kearsarge* must have contained several times more powder than the shells of the *Alabama* and were besides more effective. The action was decided by shells and we submit that the two vessels were no match whatever. One had the best shell guns ever invented, the other had guns that were not adopted for shell practice at all.

Finally, it is impossible that the crew of the *Alabama* could be as effective as that of a *bona fide* man of war. We know that the British naval authorities have never been able to organise a man of war out of England, and we know that all attempts to man and equip even a gun boat in Hongkong have failed. It is astonishing how Capt. Semmes kept his crew together as he did, but we know from the number of men which he has left behind him at different ports that there was nothing like man of war discipline maintained on board his ship. In fact from the buccaneering life they led it was impossible.

Ergo—in ship, battery, and crew the ships were no match—Capt. Semmes had been puffed off his legs—Capt. Winslow is clearly a practical seaman and a right good officer, but we think he should not have taken an hour to have sunk the *Alabama*.

PENINSULAR & ORIENTAL STEAM NAVIGATION COMPANY.

NOTICE OF REDUCTION OF PASSAGE MONEY.

IN the year 1857 the Directors made a considerable reduction in the Company's rates of Passage Money, which continued in force till 1861. In that year, owing to the extraordinary rise in the Cost and Freight of Coals, and the enhanced price of all descriptions of Naval Stores, the Directors were reluctantly compelled to return to the rates of Passage Money previously in force. They are now happy to state that a decrease in the price of Coal and other expenses of Steam Navigation enables them to reduce the Company's Passage rates to the undernoted scale, which will take effect from and after the 1st June next, viz:—

NEW AND INFALLIBLE METHOD.

Treatment instantaneous and radical cure of Corns and other excrescences of the Feet.

F. M. DEFRIES.

Chiropodist of the Imperial Houses of France and Brazil.

Having arrived on a professional visit to this Colony, can be consulted every day, between the hours of 10 A.M. and 4 P.M. at the Residence lately occupied by Dr. L. PEBAQUE Surgeon Dentist, 5 doors North of the American Consulate, Wyndham Street.
Through the means of a new process, Mr. Defries expels the corns from the foot, as also any excrescences in the soles of the feet, without cutting them or in any way puncturing the flesh.
He possesses an Elixir of his own invention, which is of the greatest efficacy for curing corns even should they have suppurated.
Mr. Defries operates without causing the smallest pain to the patient, who on the completion of the operation can wear a light shoe without special inconvenience to the spot whence the corn may have been extracted.
Mr. Defries possesses a vast number of testimonials of the highest class, which are at the service of the public for inspection. He begs that his method may not be confused with that of other Chiropodists. His stay here will be only one month, and he will attend the residence of any patients who may require his professional services.
